Julie, we just posted a fact sheet about the history on our site.

<http://www2.epa.gov/goldkingmine/gold-king-mine-watershed-fact-sheet>

We also posted new photos of the work happening at the mine right now – if you need something specific, let me know.

And you've probably already seen this, but this CSM piece from last night might be useful:
<http://www.csmonitor.com/Environment/2015/0815/Colorado-river-spill-Fixing-the-1872-law-that-haunts-thousands-of-old-mines>

Tell me what else you need. And don't hesitate to call my cell if you need to.

Got it, thank you, thank you.

This is a story that I mentioned last week to several of your colleagues, about the history of mining in San Juan County -- essentially how it arrived at toxic waste problem it has today.

I'm good for now. Unfortunately, it's nearing the time where I cannot add anything new.
